

IN THE SPECIFICATION:

Please amend the Specification as follows: In the Summary of the Invention, please replace the first paragraph with the following paragraph, which shows deletions with brackets and additions with underlining:

The present invention provides an adapter for coupling a power module with a first pin configuration to an end user's circuit card having a second pin configuration. The power module can be a DC-to-DC converter or an AC-to-DC [inverter] converter or any other sort of power module. Additional components may be added to the adapter to improve performance, add features and result in a better match for existing equipment. The adapter can have a first surface and a second surface. The first surface can be populated with a first set of interconnects, while the second surface can be populated with a second set of interconnects.

Following is a clean version of the replacement paragraph for the first paragraph of the Summary of the Invention:

71
The present invention provides an adapter for coupling a power module with a first pin configuration to an end user's circuit card having a second pin configuration. The power module can be a DC-to-DC converter or an AC-to-DC converter or any other sort of power module. Additional components may be added to the adapter to improve performance, add features and result in a better match for existing equipment. The adapter can have a first surface and a second surface. The first surface can be populated with a first set of interconnects, while the second surface can be populated with a second set of interconnects.
